Summary

Left being a general manager in the wholesale floral industry to enter the career field I have always wanted to be in, Web Development. I learned HTML and CSS in 7th grade and have loved programming and manipulating computers since then. A recent graduate of the UCF Coding Bootcamp and ready to put my skills to work. We learned the MERN stack, but for the final project dove into Angular and Typescript. Love it all. I am very passionate about developing sites and applications that can make a real impact on today's society.

Experience

Apr 2010 - May 2013
